

The diagram illustrates the linear model equation $\mathbf{h} = \theta_0 + \Theta \cdot \mathbf{x}$. Each term is represented by a colored rectangle: $\mathbf{h}$ is an orange rectangle, θ_0 is a light blue rectangle with a dark blue border, Θ is a larger orange rectangle, and $\mathbf{x}$ is a light blue rectangle with a dark blue border. Below each rectangle is its dimensionality: $k \times 1$ (orange), $k \times 1$ (teal), $k \times d$ (orange), and $d \times 1$ (dark blue). The symbols $\mathbf{h}$, θ_0 , Θ , and $\mathbf{x}$ are in a black serif font, while the dimensions are in a matching color script font.

$$\mathbf{h} = \theta_0 + \Theta \cdot \mathbf{x}$$

$k \times 1$ $k \times 1$ $k \times d$ $d \times 1$
